TITLE	1978 Elementary and Secondary Schools Civil Rights Survey: Analysis of Selected Civil Rights Issues. Volume I, Reports on Ranked Districts for the Nation.
INSTITUTION	Killalea Associates, Inc., Arlington, Va.
SPONS AGENCY	Office for Civil Rights (DHEW), Washington, D.C.
PUB DATE	Jul 78
CONTRACT	100-78-0063
NOTE	362p.; Not available in paper copy due to reproduction quality of original document.
EDRS PRICE	MF01 Plus Postage. PC Not Available from EDRS.
DESCRIPTORS	Bilingual Students; Civil Rights Legislation; Classroom Desegregation; *Compliance (Legal); Elementary Secondary Education; *Equal Education; *Federal Legislation; Mainstreaming; Minority Group Children; Non English Speaking; Physical Disabilities; School Desegregation; *School Districts; School Statistics; Sex Discrimination; State Surveys; Suspension; Wheel Chairs

ABSTRACT

This report is drawn from a 1978-79 survey of 6,069 school districts in 50 States regarding their compliance with Federal desegregation and equal education laws. The following areas are considered: (1) pupils identified as requiring special education services but not currently enrolled; (2) State summaries of unserved students in special education; (3) disproportionate representation of minorities in special education; (4) disproportionate representation of males and females in special education; (5) isolation of pupils in wheelchairs; (6) mainstreaming in special education; (7) disproportionate representation of other than English speaking pupils in special education; (8) unserved students in bilingual education; (9) segregation among schools; (10) segregation in classrooms; (11) overrepresentation of minorities suspended; and (12) disproportionate male and female participation in introductory courses in home economics and industrial arts. For each area, the 100 districts in the nation deemed to merit investigation for possible compliance problems are ranked by severity of the problem. Appended is a review of the principal methods used in the analysis. (Author/GC)

INTRODUCTION

Under Contract HEW-100-78-0063, Killalea Associates, Incorporated has analyzed the data submitted in the 1978-79 Elementary and Secondary School Civil Rights Survey to identify districts with potential compliance problems. This report contains the results of these analyses. The report is designed to assist regional headquarters staff of the Office for Civil Rights in selecting school districts for compliance reviews. The final selection of districts for review will, of course, be based on additional information, such as the civil rights history of the districts.

STRUCTURE OF THE REPORT

Volume I is a summary volume containing, for each of the 12 issue areas, a list of the 100 districts in the nation deemed to merit investigation for possible compliance problems. The districts are ranked, in descending order, by the severity of the problem. This volume also contains an appendix that reviews in some detail the principal methods used in the analysis.

Volume II contains, for each of the 12 issues, a list of the 50 districts in a region that may warrant investigation. This volume is produced in ten sets, one for each OCR region.

Within Volumes I and II, each issue is introduced by a user's guide that describes the relevant data for the issue, analytic methods, and information in the table.

FORMAT FOR THE ISSUE ANALYSES

Both national and regional volumes have been designed so that each issue has a complete user's guide explaining the purpose of the report, data used, method of analysis, and format for the table. Each such section is a self-contained document that obviates the need to refer to other sections for explanations. Of course, placing all these self-contained documents in a single volume creates repetition, but this was felt to be a small price to pay for the ease with which a particular section could be understood. An exception to this rule of repetition is the technical material, contained in an appendix, which was felt to be of interest primarily to statistical analysts.

The format for the tables varies according to the content but all tables have the following general structure in common. The left-most column is the rank of the district, in descending order, relative to all other districts in the nation. The next set of columns identifies the district. The first columns following the identifying information contain the data on which the ranking is based. The final set of columns provides as much background data as seemed appropriate and would fit on the page. For certain issues, if the table could not contain all information that a reviewer might wish to see, detailed information is provided in additional tables.

ANALYTIC METHODS FOR ISSUES

The general approach in this report has been to rank districts by the seriousness of apparent compliance problems based on an index reflecting the extent and severity of the problem. Because the issue areas to be examined differ in nature, several methods were employed.

A number of issues concern the disproportionate representation of a group in a program, e.g., minorities in special education. For these issues, the disproportionate number in the group who are over- or underrepresentated was calculated. To insure that only districts with a significant disproportion were considered in the ranking, a statistical test, described in Appendix A, was conducted. The disproportionate percent was calculated by dividing the disproportionate number of pupils by the number in the program. Districts were ranked according to the magnitude of the product of these two measures, the disproportionate number and the disproportionate percent.

In another group of issues, the concern was the extent to which a population was underserved, e.g., pupils requring special education but not participating in such programs. In these analysis, the number unserved and the percent unserved (number unserved divided by the number identified as requiring special programs) were the two measures employed. The district ranking was based on the magnitude of the product of the two measures.

A third group of issues concerns the extent to which a given group of students is segregated from the rest of the pupils, e.g., assignment of pupils to schools based (at least partly) on race or ethnicity. For these issues, the analyses employed the Desegregation Index (DI), which measures the amount of contact a selected group has with another group. The DI was used in this report not only to analyze segregation among schools but also to analyze the segregation of minority pupils within schools, isolation of wheelchair pupils, and segregation of special education pupils. The DI is described in detail in Appendix A.

Additional methods have been developed to suit particular purposes and are discussed in the text associated with the analysis of the issue. For example, the 1978-79 survey did not explicitly ask for information that would lead to an assessment of disproportionate travel burden on handicapped pupils. The survey did contain questions, however, on the schools that have accessible entrances and other facilities. The percentage of all schools in a district that had accessible entrances was considered to be an indirect measure of disproportionate travel burden on the pupils affected.

ISSUES ANALYZED

The issues addressed in the report consist of:

A. Unserved in special education: Pupils identified as requiring special education services but not currently enrolled

B. State summaries of unserved in special education

C. Disproportionate representation of minorities in special education

D. Disproportionate representation of males and females in special education

E. Isolation of pupils in wheelchairs

F. Mainstreaming in special education

G. Disproportionate representation of other than English speaking pupils in special education

H. Unserved in bilingual education

I. Segregation among schools

J. Segregation in classrooms

K. Overrepresentation of minorities suspended

L. Disproportionate male and female participation in introductory courses in home economics and industrial arts

Most of these issues are analyzed by ranking districts in terms of potential compliance problems. One analysis, which requires a different treatment, is a summary of students unserved in special education listed in alphabetical order by state.

DATA FOR ISSUE ANALYSIS

This report is based on data collected by the 1978-79 survey of 6,069 school districts. The data base contains submissions from virtually all of these districts. The districts missing are very small except for Chicago, for which only partial data was received by June 1979. The omission of Chicago from the data base is not a major drawback because OCR has been recently investigating that district. Data for New York, which was also received in June, has been added to the data base. However, it contains many errors and, in particular, does not include male-female data on certain items. Again, New York is currently under investigation by OCR.

Some Massachusetts districts supplied special education data in OCR format and others used a state-supplied format. Data in the state format could not be included in the data base. Therefore, certain analyses of special education issues could not be conducted on more than half of the Massachusetts districts.

This report was produced in mid-July for use in the development of OCR's Annual Operating Plan. At that time, the process of detecting data errors, obtaining correct data from school districts, and revising the data had not been completed.

The tabulations presented here have been designed to include all data items for which reasonable entries are available. Safeguards have been incorporated to reduce the effect of data errors on the analyses. For instance, when data for a school was clearly in error, the school was dropped from consideration (although the rest of the district was then analyzed). There is the possibility that errors remain and the reader is cautioned to keep this in mind when using these reports.

UNSERVED IN SPECIAL EDUCATION

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for failure to serve children requiring special education. As some of these districts may have under counted the number of pupils in special education, obtain corrected data from the Data Analysis Section before selecting a district for review!

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments instruments and their content are as follows:

101-7a Number of resident children identified as requiring special education.

101-7b Number of resident pupils participating in special education programs in this district or in another district or agency.

101-7c Number of resident pupils who, for the sole purpose of receiving full- or part-time special education, participate in such programs outside this district.

101-7d Of the resident pupils in 7c, the number for whom full costs are not provided from public funds.

101-7e Number of resident children, not included in 7a, who need evaluation but have not yet been evaluated.

102-9m Number of pupils participating in special education programs.

Analytic Method

The analysis is based on the number and percent of children requiring special education services but not receiving them. It might be thought that the number served would be the difference between the number identified (item 101-7a) and the number participating (item 101-7b). However, those participating in special education programs indicates pupils whose full costs are not provided from public funds (item 101-7d). It would be inappropriate to count pupils not being fully served from public funds as being served. Accordingly, the number of pupils in 7d is subtracted from the number in 7b to obtain the number of pupils served from public funds. The difference between this number and the number identified is the number unserved. The percent unserved is the number unserved divided by the number identified. The product of the number and percent unserved is the quantity on which the districts are ranked.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

IDENTIFIED The number (NUMBER) of students identified as requiring special education and the percent (PCT OF ENR) these pupils are of the district enrollment.

UNSERVED The number (NUMBER) of students requiring but not receiving special education and its rank (RANK) in relation to all other districts in the nation. The percent (PCT) of these students that are unserved and its national rank (RANK).

SERVED The number of pupils receiving special education services by the district (BY DIST) and by some outside agency (OUTSIDE). The former is the sum of the pupils in special education (item 102-9m). That count is subtracted from the total served to give the count of pupils receiving services from some outside agency. The number thus obtained for students served outside is not the same (is usually larger) than the number of resident pupils who attend full-time elsewhere for the sole purpose of receiving full or part-time special education (item 102-7e).

NOT PAID The number of pupils for whom full costs are not provided from public funds.

NOT EVAL The number of resident children who have been identified as needing evaluation but have not yet been evaluated to determine if they require special education.

DIST ENROL Total district enrollment.

PCT MIN Percent minority enrollment in the district.

STATE SUMMARIES OF UNSERVED IN SPECIAL EDUCATION

User's Guide

This report lists the number of pupils identified as requiring special education, the number served and unserved, and the percent unserved by each state.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

101-7a Number of resident children identified as requiring special education.

101-7b Number of resident pupils participating in special education programs in this district or in another district or agency. The figures for each state are obtained by summing counts in each district in a state.

101-7c Number of resident pupils who, for the sole purpose of receiving full- or part-time special education, participate in such programs outside this district.

101-7d Of the resident pupils in 7c, the number for whom full costs are not provided from public funds.

102-9m Count of pupils participating in special education programs.

Analytic Method

The analysis is based on the number and percent of children requiring special education services but not receiving them for each of the states. It might be thought that the number served would be the difference between the number identified (item 101-7a) and the number participating (item 101-7b). However, those participating in special education programs pupils whose full costs are not provided from public funds (item 101-7d). It would be inappropriate to count pupils not being fully served from public funds as being served. Accordingly, the number of pupils in 7d is subtracted from the number in 7b to obtain the number of pupils served from public funds. The difference between this number and the number identified is the number unserved. The percent unserved is the number unserved divided by the number identified.

Information in Table

States are listed alphabetically and national totals are presented at the end of the table.

DISPROPORTIONATE REPRESENTATION OF MINORITIES IN SELECTED SPECIAL EDUCATION PROGRAMS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for discrimination in the disproportionate placement of minorites in the first six of seven special education programs, which are as follows:

1. Educable mentally retarded
2. Trainable mentally retarted
3. Seriously emotionally disturbed
4. Specific learning disabled
5. Speech impaired
6. Socially maladjusted
7. Gifted or talented

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-9a-e Count of pupils, by race and ethnic categories, in the first five special education programs.

102-9f-g Count of pupils, by racial and ethnic categories, for the last two programs.

Analytic Method

The analysis is based on the difference between the actual participation in the first six of the seven special education programs and the participation that could be expected if assignments were independent of race or ethnicity. For each of the programs, the numerical difference or disproportionate number and the disproportionate percent (the disproportion divided by the number of pupils in that program) are multiplied. The sum of these products is the quantity on which the districts are ranked. To insure that only districts in which discrimination may really be present are considered, tests of significance were conducted. The test is described in Appendix A.

Information in Table

RANK The rank of each district, in descending order, relative to all

other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
(1)0. ESAA/OCR "High Interest"

RANK IN EACH PROGRAM The national rank for each of the seven special education programs. A dash (-) indicates that the program was not ranked.

DISPROPORTION IN WORST PROGRAM The worst special education program (PROG) is identified and followed by the disproportionate number (NUM) of minority students and its rank (RANK), in relation to all other districts in the country, and the percent (PCT) that the disproportion is to the number of students in that program and its national rank (RANK). A district's worst program is not necessarily the one with the lowest rank under RANK IN EACH PROGRAM. That is, even though a district's rank in EMR might be 16 and its rank in TMR is 11, the worst program might be the EMR program if it had more minorities in disproportion than TMR.

DIST ENROL Total district enrollment.

PCT MIN Percent minority enrollment in the district.

Detailed Information

Detailed data on enrollment in the seven special education programs is provided in a separate table following the ranking analysis.

DETAILED REPORT ON ENROLLMENT IN SPECIAL EDUCATION IN RANKED DISTRICTS

User's Guide

This report presents, for each of the 100 districts in the nation targeted for possible discrimination in the disproportinate placement of minorities in special education, data on enrollment in each of seven programs by race or ethnicity. The districts are presented in the order established by the ranking analysis.

Information in Table

The first row shows:

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

The succeeding rows, by district or special education program, show:

NUMBER The number (NUMBER) of pupils by race or ethnicity, e.g., AM INDIAN,

that are enrolled in the district or a particular special education program.

PCT The percent (PCT) that the racial or ethnic enrollment is to the district or program. A comparision between the two percents can be used to locate disproportionate representation by each racial or ethnic category.

DISPROPORTIONATE REPRESENTATION OF MALES AND FEMALES IN SELECTED SPECIAL EDUCATION PROGRAMS

User's Guide to the Ranking Report

This report list the 100 districts in the nation which most appear to warrant investigation for discrimination in the disproportionate placement of males and females in the first six of seven special education programs, which are as follows:

1. Educable mentally retarded
2. Trainable mentally retarded
3. Seriously emotionally disturbed
4. Specific learning disabled
5. Speech impaired
6. Socially maladjusted
7. Gifted or talented

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-9a-e Count of pupils, by sex, in the first five special education programs.

102-5f,g Count of pupils, by sex, for the last two programs.

Analytic Method

The analysis is based on the difference between the actual participation in the first six of the seven special education programs and the participation that could be expected if assignment were independent of sex. For each of the programs, the numerical difference or disproportionate number and the disproportionate percent (the disproportion divided by the number of pupils in that program) are multiplied. The sum of these products is the quantity on which the districts are ranked. To insure that only districts in which discrimination may really be present are considered, tests of significance were conducted. The test is described in Appendix A.

Information in the Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

RANK IN EACH PROGRAM The national rank for each of the seven special education programs. A dash (-) indicates that the program was not ranked.

DISPROPORTION IN WORST PROGRAM The worst special education program (PROG) is identified and followed by the disproportionate number (NUMBER) of students by sex and its rank (RANK), in relation to all other districts in the country, and the percent (PCT) that the disproportion is to the number of students in that program and its national rank (RANK). A district's worst program is not neces sarily the one with the lowest rank under RANK IN EACH PROGRAM. That is, even though a district's rank in EMR might be 16 and its rank in TMR is 11, the worst program might be the EMR program if it had more pupils by sex in disproportion than TMR.

DIST ENROL Total district enrollment.

PCT MIN Percent minority enrollment in the district.

Detailed Information

Detailed data on enrollment in the seven special education programs is provided in a separate table following the ranking analysis.

DETAILED REPORT ON MALE AND FEMALE ENROLLMENT IN SPECIAL EDUCATION IN RANKED DISTRICTS

User's Guide

This report presents, for each of the 100 districts in the nation targeted for possible discrimination in the disproportionate placement of males and females in special education, data on enrollment in each of seven programs by race or ethnicity. The districts are presented in the order established by the ranking analysis.

Information in the Table

The first row shows:

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

The succeeding rows, by district or special education program, show:

NUMBER The number (NUMBER) of pupils by sex and total that are enrolled in the district or a particular special education program.

PCT The percent (PCT) that enrollment by sex and total is to the district or program. A comparision between the two percents can be used to locate disproportionate representation by sex.

DETAILED REPORT ON MALE/FEMALE ENROLLMENT IN SPECIAL EDUCATION IN RANKED DISTRICTS

ISOLATION OF PUPILS IN WHEELCHAIRS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation that must appear to warrant investigation for discrimination against physically handicapped pupils, either in their assignment to schools or in the provision of adequate accommodations.

Relevant Data

The report used data from the OS/CR 101 and 102 forms. The data items in these instruments and their contents are as follows:

102-6a Number of pupils in wheelchairs.

102-6b Number of schools that have accessible entrances.

102-6c Of accessible schools, the number with accessible restrooms and science laboratories (for science laboratory courses offered).

102-9m Number of pupils in special education programs.

Analytic Method

The analysis is based on the extent to which pupils in wheelchairs are segregated from other students. Segregation in this context means that the pupils are denied the opportunity to interact with regular pupils. If pupils attend schools in which a large part of the enrollment is in special education, this is not considered a desegregated environment. The index for the isolation of wheelchair pupils (WCDI) uses the same method as for school desgregation, except for reducing the school's enrollment by the number of special education pupils. The WCDI is the quantity on which the districts are ranked. This index is described in Appendix A.

Information in the Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

WCDI The Wheelchair Desegregation Index. The lower the value, the more segregated the district for wheelchair students.

SCHS IN DIST, SCHS WITH ACCESS ENTR, AND PCT WITH ACCESS ENTR The total number of schools in the system (SCHS IN DIST), the number of schools with entrances accessible for pupils in wheelchairs (SCHS WITH ACCESS ENTR), and the percent that have accessible entrances (PCT WITH ACCESS ENTR).

The percent of schools that have accessible entrances is a rough measure of the travel burden placed on wheelchair pupils by the system as a whole. This percent is, of course, not completely comparable with the results of the WCDI. On one hand, a relatively large percentage of schools might have accessible entrances and many of these schools could enroll large numbers of special education pupils, which would result in a low WCDI. On the other hand, a relatively few schools may have such entrances but house mostly regular pupils, which would result in a high WCDI. This percent acessible measure is therefore complementary to the WCDI.

SCHOOLS WITHOUT ACCESSIBLE: The number of schools in the district that do not have accessible entrances (ENTR), restrooms (RESTROOM), or science laboratories (LAB).

ENROLLMENT The total district (DIST) enrollment and the number of students in wheelchairs (IN WHEELCHAIR).

MAINSTREAMING OF SPECIAL EDUCATION PUPILS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for failure to mainstream pupils in special education programs.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-9a-1 Number of pupils participating in special education and the number in these programs (1) less than ten hours per week, (2) 10 or more hours per week but less than full time, and (3) full time.

102-5f Number of pupils in programs for the socially maladjusted.

Analytic Method

The analysis looks at two factors that are required to assess the extent of meaningful mainstreaming. The first is the amount of time spent in the special program. If a pupil spends less than 10 hours in the program but is in a school that serves only special education pupils, no meaningful mainstreaming has taken place. The index of segregation of special education students (SEDI) uses the same method as for school desegregation. The SEDI is the quantity on which the districts are ranked. This index is described in Appendix A.

Information in the Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"

6. ESAA

7. ESAA/Voluntary Plan

8. ESAA/Court Order

9. ESAA/Litigation

(1)0. ESAA/OCR "High Interest"

SEDI The Special Education Desegregation Index. The lower the value, the more segregated the district for special education pupils.

ALL SPECIAL EDUCATION PROGRAMS Under the three categories of time in special education, less than ten hours (LT 10 HOURS), ten hours or more but less than full time (GT 10 HRS BUT LT FULL TIME), and full time (FULL TIME), are the number of pupils expected (EXP) and actually participating (ACT). The expected number is based on national percents from each of the 12 special education programs.

WORST PROGRAM Information identical to the preceding for the program in which the difference between expected and actual is greatest. Under program (PROG) is a code indicating the program. The designations are as follows:

EMR - Educable mentally retarded

TMR - Trainable mentally retarded

SED - Seriously emotionally disturbed

SLD - Specific learning disability

SPCH - Speech impaired

DFBL - Deaf and blind

ORTH - Orthopedically impaired

VIS - Visually handicapped

DEAF - Deaf

OTHR - Other health impaired

MULT - Multihandicapped

Detailed Information

Detailed data on mainstreaming is provided in a separate table following the ranking analysis.

DETAILED REPORT ON MAINSTREAMING OF SPECIAL EDUCATION PUPILS IN RANKED DISTRICTS

User's Guide

This report presents detailed data on participation of special education pupils by time spent in the program for the 100 districts in the nation which most appear to warrant investigation.

Information in Table

The first row of the table shows:

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explantory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

The succeeding rows, by special education programs, show:

LT 10 HRS The number of students that were expected (EXP) to be in special education classes less than 10 hours per week (LT 10 HRS) and the actual (ACT) number.

MT 10 HRS BUT LT FULL The number of students that were expected (EXP) to be in special education classes more than 10 hours per week but less than full time (MT 10 HRS BUT LT FULL) and the actual (ACT) number.

FULL TIME The number of students that were expected (EXP) to be in special education classes full time (FULL TIME) and the actual (ACT) number.

AVG PCT REGULAR ENROL IN SCHOOL The average percent of regular classroom pupils enrolled in schools attended by special education students.

DISPROPORTIONATE REPRESENTATION OF LES/NES PUPILS IN SELECTED SPECIAL EDUCATION PROGRAMS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for discrimination in the disproportionate placement of LES/NES pupils in five special education programs, which are as follows:

1. Educable mentally retarded
2. Trainable mentally retarded
3. Seriously emotionally disturbed
4. Specific learning disabled
5. Speech impaired

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-5b	Count of pupils who speak or use a language other than English more often than English.
102-9a-e	Count of pupils, by race and ethnic categories, in the first five special education programs.
102-9(col 9)	Count of pupils in the five special education programs who are limited or non-English speaking.

Analytic Method

The analysis is based on the difference between the actual participation in special education programs and the participation that could be expected if assignments were independent of English fluency. For each of the programs, the numerical difference or disproportion and the disproportionate percent (the disproportion divided by the number of pupils in that program) are multiplied. The sum of these products is the quantity on which the districts are ranked. To insure that only districts in which discrimination may really be present are considered, tests of significance were conducted. The test is described in Appendix A.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation

(1)0. ESAA/OCR "High Interest"

DISPROPORTION IN SPEC ED The disproportionate number (NUMBER) of LES/NES students and its rank (RANK) in relation to all other districts in the nation. The percent (PCT) that the disproportion is to the number of pupils in the five special education programs and its national rank (RANK).

ENROLLMENT The total district enrollment (DIST), the number of pupils in the five special education programs (SPEC ED), and percent (PCT) that the special education students are to the district enrollment.

LES/NES PUPILS The number of LES/NES students in the district (DIST), the number of LES/NES pupils in the five special education programs (SPEC ED), and the percent (PCT) LES/NES special education students are to the LES/NES enrollment.

UNSERVED IN BILINGUAL EDUCATION

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for failure to serve pupils requiring bilingual education.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-5a Count of pupils by racial and ethnic categories.

102-5b Count of pupils, by racial and ethnic categories, who speak or use a language other than English more often than English.

102-5c Of pupils counted in 5b, those currently enrolled in a bilingual program or any non-language class taught in a language other than English.

Analysis Method

The analysis is based on the number and percent of other than English speaking pupils (OTES) unserved. The product of the number and percent unserved is the quantity on which the districts are ranked.

Information in Tables

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"

6. ESAA

7. ESAA Voluntary Plan

8. ESAA/Court Order

9. ESAA/Litigation

(1)0. ESAA/OCR "High Interest"

UNSERVED The number (NUMBER) of other than English speaking pupils unserved and its rank (RANK) in relation to all other districts in the nation. The percent (PCT) of other than English speaking pupils unserved and its national rank (RANK).

IDENT The number of children identified as speaking or using a language other than English more often than English.

ADDITIONAL DATA The percent of other than English speaking pupils (PCT OTES) in the district by race and ethnicity, e.g., AM IND, and the percent unserved (PCT UNS).

SEGREGATION AMONG SCHOOLS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for segregative practices in the assignment of pupils to schools.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

101-8a Count of pupils enrolled in the district by race and ethnic categories.

102-5a Count of pupils enrolled in each school by race and ethnic categories.

Analysis Method

This analysis is based on the extent to which minority students are segregated from other students. Segregation in this context means that minority pupils are denied the opportunity to interact with non-minority pupils. The Desegregation Index (DI) measures the extent to which assignments to schools vary from what would be expected on the basis of the district's minority composition. The DI is the quantity on which the districts are ranked. This index is described in Appendix A. A ranked district is only reported if the minority composition in at least one school differs by more than 20 percent from the district's minority composition.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation

5. OCR "High Interest"

6. ESAA

7. ESAA/Voluntary Plan

8. ESAA/Court Order

9. ESAA/Litigation

(1)0. ESAA/OCR "High Interest"

DI The Desegregation Index for the district. The lower the value, the more segregated the district for minority students.

TRANSFER The number (NUMBER) of pupils and the percent (PCT) of the total district enrollment who would have to be transferred to bring all schools to within 20 percent of the district minority composition.

PCT MINORITY PUPILS IN: The percentage of the district's entire minority enrollment that is in schools that are 80 to 100 percent minority, 90 to 100 percent minority, and 99 to 100 percent minority.

DIST ENROL Total district enrollment.

PCT MIN Percent minority enrollment in the district.

SEGREGATION IN CLASSROOMS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation which most appear to warrant investigation for segregative practices in the assignment of pupils to classrooms within schools.

Relevant Data

The report used data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-5a Count of pupils, by racial and ethnic categories, enrolled in each school.

102-7 Count of pupils, by racial and ethnic categories, assigned to a sample of classrooms in each school.

Analysis Method

The analysis is based on the extent to which minority students are segregated from other students within schools. Segregation in this context means that minority pupils are denied the opportunity to interact with non-minority pupils in classrooms within schools. The Classroom Desegregation Index (CDI) measures the extent to which assignment to classrooms within schools varies from what would be expected on the basis of each school's minority composition. The CDI is the quantity on which the districts are ranked. This index is described in Appendix A.

It is important to note that not all classrooms should be incluced in an analysis of classroom segregation. Those in which a bilingual program is offered would reasonably and without discrimination have an excess of Hispanic, American Indian or Alaskan Native, and Asian or Pacific Islander pupils. Similarly, pupils in which compensatory or remedial instruction are offered may appropriately have disproportionate numbers of minorities. The source of data for classroom assignments (item 102-7) provides codes that identify such classrooms and, when appropriate, these classrooms were excluded from the analysis.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

CDI Classroom Desegregation Index for the district. The lower the value, the more segregated the district in classrooms.

EXCESS The disproportionate number (NUMBER) and the percent (PCT) that the disproportion is to the number of pupils in the classrooms.

NUMBER OF CLASSROOMS The number of classrooms tested (TESTED) and the number of classrooms with disproportions (IN EXCESS) by those that have minorities (Min) excess and those that have non-minorities (NON Min) excess.

ENROLL The total district enrollment.

PCT MIN The percent minority enrollment in the district.

OVERREPRESENTATION OF MINORITIES IN SUSPENSIONS

User's Guide to the Ranking Report

This report lists the 100 districts in the nation that most appear to warrant investigation for discrimination in overrepresenting minorities in suspensions.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

101-8b Count of pupils, by racial and ethnic categories, expelled in the 1977-78 school year.

102-5d Count of pupils, by racial and ethnic categories, who received corporal punishment in the 1977-78 school year.

102-5e Count of pupils, by racial and ethnic categories, suspended from school for at least one day in the 1977-78 school year.

Analytic Method

The analysis is based on the extent to which suspensions by racial and ethnic categories differ from what could be expected if such action were independent of race or ethnicity. The numerical difference or number in excess and the percent in excess (the excess divided by the number of pupils suspended) are multiplied. The product is the quantity on which the districts are ranked. To ensure that only districts in which discrimination may really be present are ranked, a test of significance was conducted. The test is described in Appendix A.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan

3. Court Order

4. Litigation

5. OCR "High Interest"

6. ESAA

7. ESAA/Voluntary Plan

8. ESAA/Court Order

9. ESAA/Litigation

10. ESAA/OCR "High Interest"

EXCESS IN SUSPENSIONS The number (NUM) of minority students in excess and its rank (RANK) in relation to all other districts in the nation. The percent (PCT) that the excess is to the number of students suspended and its national rank (RANK).

EXCESS IN OTHER ACTIONS The number (NUM) and percent (PCT) of minority students in excess and their respective ranks (RANK) for expulsions (EXPULSIONS) and corporal punishment (CORP PUNISHMENT).

ENROL Total district enrollment.

PCT MIN Percent minority enrollment in the district.

Detailed Information

Detailed data on disciplinary actions by race and ethnicity is provided in a separate table following the ranking analysis.

DETAILED REPORT ON DISCIPLINARY ACTIONS IN RANKED DISTRICTS

User's Guide

This report presents, for each of the 100 districts in the nation targeted for possible discrimination in the disproportionate suspensions of minorities, data on enrollment in each of three categories by race or ethnicity. The districts are presented in the order established by the ranking analysis.

Information in Table

The first row shows:

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code, which is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designations are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
10. ESAA/OCR "High Interest"

The succeeding rows, by district or disciplinary actions, show:

NUMBER The number (NUMBER) of pupils by race or ethnicity, e.g., AM INDIAN,

that are enrolled in the district or a particular special education program.

PCT The percent (PCT) that the racial or ethnic enrollment is to the district or program. A comparison between the two percents can be used to locate disproportionate representation by each racial or ethnic category.

DISPROPORTIONATE MALE AND FEMALE PARTICIPATION IN INTRODUCTORY COURSES IN HOME ECONOMICS AND INDUSTRIAL ARTS

User's Guide to the Ranking Report

This report list the 100 districts in the nation that most appear to warrant investigation for discrimination in the segregation of sexes in introductory courses in home economics and industrial arts.

Relevant Data

The report uses data from the OS/CR 101 and 102 forms. The data items in these instruments and their content are as follows:

102-10 Count of pupils, by sex, enrolled in home economics and industrial arts courses in the 7th, 8th, or 9th grades.

102-11 Count of pupils, by sex, participating in interscholastic teams that have all female, all male, or both sexes.

102-7 Count of pupils, by sex, enrolled in selected classes in office occupations and other vocational education.

Analytic Method

The analysis is based on the difference between the actual participation in home economics and industrial arts and the participation that could be expected if assignments were independent of sex. For both programs, the numerical difference or disproportionate number and disproportionate percents (the disproportion divided by the number of students in the program) are multiplied. The sum of these products for both programs is the quantity on which the districts are ranked.

It is common in this kind of analysis to perform a test of significance, to ensure that only districts in which discrimination may really be present are ranked. A statistical test of significance, described in Appendix A, was applied in this analysis. However, if a district contained at least one school that operated courses restricted to only one sex, any excess was considered to be significant, whether or not it was statistically significant.

Information in Table

RANK The rank of each district, in descending order, relative to all other districts in the nation.

OE CODE The Office of Education code is a seven-digit number used to identify districts.

DISTRICT NAME Self-explanatory.

ST An abbreviation of the state name.

C A code which indicates the reason for including the district in the survey. The designation are as follows:

1. Statistically Drawn
2. Voluntary Plan
3. Court Order
4. Litigation
5. OCR "High Interest"
6. ESAA
7. ESAA/Voluntary Plan
8. ESAA/Court Order
9. ESAA/Litigation
(1)0. ESAA/OCR "High Interest"

DISPROPORTIONATE REPRESENTATION The disproportionate number (NUMBER) of students by sex and its rank (RANK) in relation to all other districts in the nation. The percent (PCT) that this disproportion is to the number of pupils in home economics and industrial arts and its national rank (RANK).

PCT FEMALES IN: The percent females in classes in office occupations (OFF OCC) and other vocational education (OTH VOC ED) and interscholastic teams (SPORTS).

SCHOOLS WITH ONE-SEX OFFERINGS IN: The number of schools that offer one-sex courses or activities in home economics (HOME ECON), industrial arts (IND ARTS), physical education (PHYS ED), and interscholastic teams (SPORTS). If the entry is other than zero for home economics or industrial arts, this district was included in the analysis, whether or not the excess was statistically significant.

NUM OF SCHS Total number of schools in the district.

APPENDIX A

This appendix provides details of several analytical techniques used to measure potential discrimination.

1. Test of significance

Before targeting any school district for disproportionate representation of one or more groups of students in a program, a statistical test was performed to determine whether the disproportion was significant. The test was derived as follows:

If assignment to a program is done without regard to race, ethnicity, sex or other characteristic of interest, then the proportionate enrollment in the program of each group will be hypergeometrically distributed (sampling without replacement) with a mean equal to the proportion that the group represents of total school enrollment. If the number of students in the group is not very small (4 or 5) then this distribution can be approximated by the binomial distribution (sampling with replacement) which is computationally more efficient. That is what was done in the analyses.

The significance level selected was two standard deviations away from the mean. Thus, if a group's proportion of total school enrollment is p and if there are n pupils in the program in question, random (with respect to group membership) assignment to the program would result in an average of np members of that group in the program. Using the binomial distribution, the standard deviation from the mean would be $\sqrt{np(1-p)}$. Thus, a group's representation was considered disproportionate if it was

greater than $np + 2\sqrt{np(1-p)}$

or less than $np - 2\sqrt{np(1-p)}$

2. The Desegregation Index

The Desegregation Index (DI) measures the amount of contact that a selected group has with another group in a specified set of locations, relative to the maximum possible amount of such contact. Ordinarily, it is applied to calculate the desegregation level that results from a school system's assignment of minority and non-minority pupils to schools, but it can also be applied to other categories of pupils in a school system. The discussion begins by reviewing the standard application and then comments briefly on others.

The desegregation benefit of a particular assignment in a school is assumed to be proportional to the percentage of non-minority pupils that the typical minority pupil finds in the school. By multiplying the number of minority pupils by the proportion of non-minority pupils in the school, the total benefit from the school assignment pattern is derived. Thus, in school i, if p_i is the percentage of minority pupils and e_i is total enrollment, the benefit B_i is

$$B_i = p_i e_i (1-p_i).$$

The expression $p_i e_i$ is, of course, simply the number of minority pupils in the ith school, and $1-p_i$ is the proportion non-minority.

Consider a system with three schools:

	Enrollment TOT	MIN	P	1-P	B
School A	200	20	.1	.9	20 x .9 = 18
School B	300	240	.8	.2	240 x .2 = 48
School C	100	40	.4	.6	40 x .6 = 24
System	600	300	.5	.5	90

The DI is defined as the ratio of the benefit obtained to the maximum benefit that could be attained in the system. The maximum benefit is attained when each school is exactly at the racial composition of the system as a whole. There are 300 minority students, and the majority proportion is .5; thus, the maximum benefit is 300 x .5 = 150. The DI is calculated by dividing the actual benefit score by the maximum: 90/150 = .6.

Note that the raw benefit scores of the individual schools are independent of the racial composition of the system as a whole. This provides a computational advantage because one may wish to calculate the DI across various sets of schools; the benefit scores, once calculated, can be used for other applications. For instance, if schools A and B in our example are elementary schools, one may want to restrict an analysis to those schools (on the rationale that students in school B cannot be transferred to school C). The actual benefit score in schools A and B is 18 + 48 = 66. The maximum benefit is 124.8. The DI for just these two schools is therefore .53.

The DI has other applications to school assignment. For instance, in a large system it may be useful to examine the level of desegregation in just several geographic parts of the system so that the level in one part may be compared with the level in others, as an aid in identifying patterns of discrimination.

The procedure is similar when calculating the level of desegregation in classrooms. Benefits are calculated at the classroom level, aggregated to the school level, and further aggregated to the system level. The classroom DI, or CDI, can be calculated for any population of interest, but it is desirable to exclude any classrooms in which the population of interest might be clustered in a non-discriminating way; for example, in calculating minority classroom segregation, it is appropriate to exclude bilingual education or remedial education classrooms.

3. Wheelchair Pupil Desegregation Index

The objective of this analysis is to measure the amount of contact between pupils in wheelchairs and regular pupils. The DI can be used for this, when appropriate adjustments are made. These adjustments are needed because pupils in wheelchairs are sometimes isolated in special education schools even though they suffer no other handicap. Therefore, before computing the DI for pupils in wheelchairs, the enrollment in the school will be reduced by the non-orthopedically-impaired special education enrollment and also by the number of socially maladjusted pupils, the exact procedure is as follows:

Suppose there are n pupils in the school and w of these are in wheelchairs. Further, suppose that s pupils are enrolled in special education programs other than those for the orthopedically impaired, or are in a program for the socially maladjusted. Then the proportion of school enrollment to be ignored is

$$p = \frac{s}{n}.$$

It is assumed that pupils in wheelchairs are about as likely to suffer additional handicaps as are other pupils. Therefore, both n and w will be reduced to

$$n(1-p) \quad \text{and} \quad w(1-p)$$

respectively. These reduced pupil counts are then used as input to the DI computation.

4. Mainstreaming in Special Education

For this analysis a measure of the amount of contact between special education pupils and regular pupils is needed. Here, socially maladjusted pupils will not be counted in school enrollment since contact with them is not mainstreaming.

One difficulty in this analysis is the fact that a certain amount of isolation of special education pupils is justified by the nature of special education. The exact amount of justified isolation is not known. For the purpose of identifying potential violations, however, national average levels of isolation serve as a reasonable frame of reference. Therefore, only isolation in excess of the national average levels will be considered when computing the extent of mainstreaming, as described below.

The measure of mainstreaming used is based on the proportion of a special education pupil's contact with others that is represented by contact with regular pupils. Such a pupil's school day may be thought of as divided into two components: the part spent in special education classes, and the part outside such classes. During the former part there is no contact with regular pupils. During the latter part the proportion of the pupil's contact with others that is represented by contact with regular pupils is roughly equal to the proportion that regular pupils represent of total school enrollment. That is, if a school has n pupils, s of whom are in special education (not counting socially maladjusted pupils or the number of pupils expected to be isolated, based on national average isolation levels) then the proportion regular enrollment in the school is

$$p = \frac{n - s}{n}.$$

If a particular pupil spends a proportion of his time in special education then his proportionate contact with regular pupils will be

$$r = (1-q)\, p.$$

Consider the example illustrated in figure 1. The school contains 1000 pupils, of whom 100 are in special education. Of these 100, 50 attend special education classes less than 10 hours per week, 20 attend such classes more than 10 hours but less than full time, and 30 are in such classes full time (these are the categories available from the survey form). For the purpose of this analysis, those attending special classes less than 10 hours will be treated as fully mainstreamed (i.e., spending all their time in contact with regular pupils); those attending more than 10 hours but less than full time will be counted as being in special classes half time.

Suppose now that, based on national averages, these special education pupils would be expected to spend 25 percent of their time in special classes. Then 25 of the 30 full time pupils will be ignored in the computation of the measure of extent of mainstreaming. Then the value of r as defined above will be 0 for the remaining 5 full time pupils, $\frac{900}{975} = .92$ the 50 fully mainstreamed pupils, and

$$r = (1-.5)\left(\frac{900}{975}\right) = .46$$

for the 20 half time pupils.

The measure of extent of mainstreaming achieved is the average value of r over all special education pupils in excess of the number expected to be isolated. This average is normalized by dividing by the maximum possible value attainable in the district, so that a district with a higher proportion of special education pupils will not be penalized. The maximum possible value in a given district is attained when all special education pupils in excess of the number expected to be isolated are fully mainstreamed and are evenly distributed among all schools in the district. That value would then be equal to

$$(1-0)\ P = P$$

where P is the proportion of regular enrollment in the district.

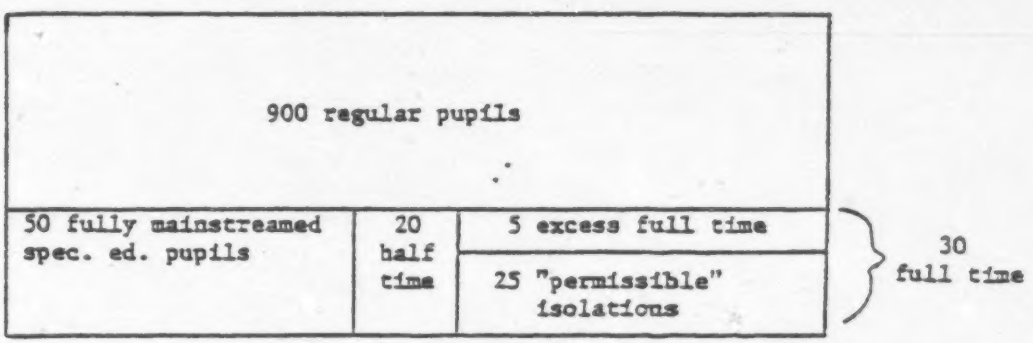

Figure 1.

The resulting value will be denoted SEDI (Special Education Desegregation Index). Its range is from 0 (total isolation) to 1 (proportion of time spent in special classes does not exceed national average, and special education pupils evenly distributed among schools). Note that a district is penalized (gets a lower score) if it either puts its special education pupils in special classes longer, or it concentrates them in certain schools.

The procedure is illustrated in the following hypothetical example. Suppose a district has two schools as follows:

		School A	School B
A.	Regular enrollment	800	2000
B.	Fully mainstreamed special ed pupils	400	50
C.	Half time special ed pupils	100	50
D.	Full time special ed pupils	200	100
E.	Average level of isolation [(D+.5C)/(B+C+D)]	.357	.625
F.	Expected level of isolation	.45	.2
G.	Excess level of isolation (E-F if > 0, 0 otherwise)	0	425
H.	Mainstreamable pupils [(B+C+D)(1-min(E,F))]	450	160
I.	Isolation level of mainstreamable pupils [G (B+C+D)/H]	0	.53

Note that the expected levels of isolation based on national averages may vary from one school to another because of different expectations for each special education program. In the example, school B may have more speech impaired pupils, whereas school A may have more EMR pupils, thus increasing its expected level of isolation. The national average proportions of time spent in special education classes, by program, based on 1978-79 data are as follows:

Educable Mentally Retarded	.64
Trainable Mentally Retarded	.93
Seriously Emotionally Disturbed	.59
Specific Learning Disability	.26
Speech Impaired	.027
Deaf-blind	.52
Orthopedically Impaired	.65
Visually Handicapped	.29
Deaf	.78
Hard of Hearing	.35
Other	.42
Multihandicapped	.83

In school A, the average contact level of the 450 special education pupils not isolated (the isolation level does not exceed expectation so the time pupils spend in special classes is entirely ignored; the 100 half time pupils are thus each counted as one-half pupil since half of their time is ignored) is

$$(1-0)\ \frac{800}{800 + 450} = .64$$

The corresponding contact level in school B is

$$(1-.53)\ \frac{2000}{2000 + 160} = .435$$

The average contact level for all mainstreamable pupils in the district is

$$\frac{450\ (.64) + 160\ (.435)}{450 + 160} = .586$$

The maximum attainable score in the district is

$$\frac{2800}{2800 + 610} = .821$$

Thus, the normalized SEDI is

$$\frac{.586}{.821} = .714$$

Note that school B is not the only source of isolation; if all 160 mainstreamable pupils in that school were in fact mainstreamed, the SEDI would be

$$\frac{450\ (.64) + 160\ (.926)}{610\ (.821)} = .871$$

Thus, about 45 percent of the total isolation(1-.714 = .286) remains (1-.871 = .129; .129/.286 = .45). In other words, about 55 percent of the excess isolation in the district results from the excessive assignment of pupils in school B to full- and half-time programs. The remaining 45 percent is due to the concentration of special education pupils in school A, which is 46.7 percent special education enrollment as compared to only 9 percent in school B.
